M2E Multichannel Connect for Square POS

List Square POS products on the online sales channels and automatically synchronize inventory and order data.

Install on Square POS | View documentation

FAQ

Which M2E Cloud app should I install?

Install the app that matches your e-commerce platform – Shopify, BigCommerce, WooCommerce, etc. Each app has its own official listing on the platform's app store.

Do I need to install more than one app?

No. You only need one M2E Multichannel Connect app per store. If you also use Amazon Multi-Channel Fulfillment, install the corresponding M2E Amazon MCF app for your platform.

Is functionality the same across all platforms?

Core marketplace and fulfillment features are consistent, but some capabilities depend on platform-specific APIs and technical limitations.

Need help?

If you run into issues during the installation of M2E Cloud apps, please contact our support team.
